

# PHY VATHANAK

**Software Developer**

**Address:** Russey Keo, Phnom Penh
**Contact:** 078569811 | vathanankphy@gmail.com
**Github:** https://github.com/vathanakphy

## SUMMARY

Passionate Computer Science student with hands-on experience in web and mobile application development, automation, and AI-related projects. A team player who enjoys solving technical problems, collaborating with others, and sharing knowledge through teaching activities. Interested in researching and exploring new technologies across different fields.

## EDUCATION BACKGROUND

**Cambodia Academy of Digital Technology - CADT** **2024 - Present**
Bachelor of Computer Science - Specialization in Software Engineering

- Fourth-Year Student

## WORK EXPERIENCE

**Software Developer Intern - SINET** **Apr - July 2026**

- Gathered user requirements and translated them into technical solutions.
- Developed and maintained an internal HR web application using Django, Next.js, and PostgreSQL to support employee management workflows.
- Implemented frontend, backend, and Telegram Bot integrations.
- Collaborated with internal users to test features and refine the application based on feedback.

**Trainer - Next-Gen Engagement Program, CADT** **Aug - Sep 2025**

- Taught C++ algorithms to first-year students.
- Developed a multiplayer quiz platform with a team and used it to assess students during class.

## ACADEMIC PROJECTS

**LegalRAG System** **Oct 2026 - Present**

- Applied web scraping, PDF text extraction, data cleaning, chunking, and text embedding to process Khmer legal documents and evaluate retrieval results.
- Built a Khmer-language similarity search using the BGE-M3 embedding model and ChromaDB.
- Developed a React.js frontend, FastAPI backend, and Telegram bot for user interaction

**Domrov LMS Automation** **Oct 2025 - Apr 2026**

- Built a monolithic NestJS REST API with React-based frontends, following the Single Responsibility Principle.
- Managed data storage using PostgreSQL, Cloudflare R2, and Redis.
- Integrated gRPC communication between NestJS and Python services with asynchronous job processing.
- Applied OWASP Top 10 security practices and automated deployment using Docker, Terraform, and GitHub Actions.

## ADDITIONAL INFORMATION

- **Technical Skills:** Java (Spring Boot), TypeScript, JavaScript, Dart, Flutter, MySQL, MongoDB, Machine Learning & AI, Computer Vision (YOLO), Unity Game Development, Linux, AWS, Git/GitHub
- **Languages:** Khmer (Native), English (B2)
- **Volunteer:** Digital Government Forum 2024, Khoding Hero 2024, Cambodia EdTech Summit 2025, and Digital Governance Forum 2025.
